国際交流の新しい風 —地球の未来を考える

岩崎 裕保 帝塚山学院大学教授・(特活)開発教育協会副代表理事

日本の発案で、2005年からUNDESD(国連持続可能な開発のための教育の10年)が、始まっています。さまざまな市民が交流をする中から、環境・人権・平和を含めた「持続可能な開発」のための手がかりを共に考えましょう。

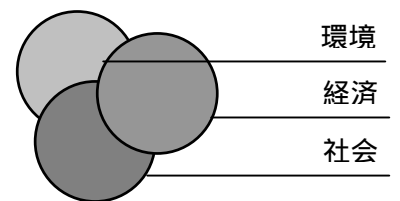

持続可能な開発のための教育(ESD)とは?

持続不可能な今の社会

これまでの大量生産・大量消費を中心に据えた「開発」は、ごみや公害により環境を悪化させ、地球資源の乱用により自然界の秩序を乱すばかりか、地域社会の荒廃を招き、さらには他の地域の貧困化を押し進めるなど、深刻な問題を引き起こしています。

持続可能な開発

わたしたちが直面する様々な課題を解決し、世界中の人々や将来の世代、みんなが安心して暮らすことのできる社会をつくるため、社会的公正の実現や自然環境との共生を重視した新しい「開発」のあり方が求められています。これが「持続可能な開発」と呼ばれるもので、その実現は人類にとって緊急の課題です。

「持続可能な社会」と「教育」
ESD = 未来をつくる教育

New wind of international exchange

— Thinking about the future of the earth

Hiroyasu Iwasaki

TEZUKAYAMAGAKUIN UNIVERSITY Professor
Development Education Association and Resource Center Sub - representative director

The UNDESD(UN Decade of Education for Sustainable Development) has been started from the year 2005 based on the idea of Japan. Let's think about the clue for "Sustainable Development" including the environment, human rights, and peace while various citizens are exchanging it.

What is ESD?

Our current unsustainable society

Living in modern-day society, we are faced with a plethora of mutually interconnected issues, including environmental problems such as global warming and acid rain, social problems such as human rights violations and cross-cultural conflict, and economic problems such as the gap between the rich and the poor.

In particular, "development", which traditionally has promoted mass-production/, and mass-consumption, is triggering a range of serious problems not only leading to the deterioration of our environment by generating refuse and pollution and disturbing the balance of the natural world through the exploitation of the earth's resources, but also contributing to the destruction of local communities and an increase in poverty in certain parts of the world.

Sustainable development

In order to solve the various problems we face and build the kind of society where everyone, including future generations, can live with a sense of security, we need to pursue a new kind of "development" in which the emphasis is on ensuring social justice and protecting the natural environment. The realization of what has come to be known as "sustainable development" is an urgent task facing the whole of humanity.
